INDUSTRIAL RUBBER PRODUCTS

## APHRODITE

**Aphrodite** is one of the leading and developing organization involved in manufacturing & supplying of Rubber products. It is working with a large number of Govt. & PSU's , along with many top-notch business houses of the country. It is the flawlessness depicted by us that has helped us to carve a niche for ourselves.

**Aphrodite** has been providing engineering expertise and product guarantees backed by the company's customer service unit and fine-tuned reputation for almost a decade.

**Aphrodite** has had consistent growth because of its adaptability and flexibility as a manufacturer and supplier and with on-time quality shipment to meet customer requirements. The '**Aphrodite Family**' , with its vast industrial experience, has achieved many milestones.

We have the adequate technical expertise, a well equipped manufacturing unit at Kolkata and an adequate in-house Laboratory. We have a team of committed professionals who , armed with the skills of pragmatism, have taken the organization to the pinnacle of success and undertake all sorts of mechanical and other requirements as per clients' specifications. We guarantee to provide you smug satisfaction. We have an **experienced Quality Control team** to have stringent tests on finished goods.

**Aphrodite Polyprene** is involved in the manufacture of Rubber Expansion Joints / Compensators / Bellows , Non Metallic Expansion Joints , Hose Connectors , etc.

We manufacture Expansion joints which are widely used in **Process Piping , Power Plants, Steel Plants , Chemical Industries , Industrial Ducting Systems , Marine Systems & Pollution and Wastewater Treatment** to allow thermal movement, reduce noise and vibration , relieve stress caused by temperature changes or forces from equipment. Rubber expansion joints are installed to isolate equipment such as pumps, compressors and chillers from the piping system. A variety of configurations are available to accommodate different shapes, service and connection requirements.

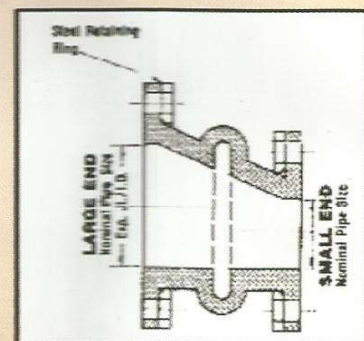

### CONCENTRIC & ECCENTRIC REDUCERS

**Aphrodite Polyprene** also manufactures **Reducing type Rubber Expansion Joints** - both **Concentric and Eccentric** types - which connects unequal size pipes. These joints eliminate the need for metallic reducers. All types of elastomer materials and non-standard designs are available.

**Concentric Reducer**

**Eccentric Reducer**

## OUR PRODUCTS & RANGE

### RUBBER EXPANSION JOINTS / BELLOWS / COMPENSATORS

for C. W. Pump Line, Condenser Inlet-Outlet Offside Pump, Cooling Tower, Pneumatic loading Cylinder of Coal Mill, Telescopic spout, ESP Hopper In & Outlet etc.

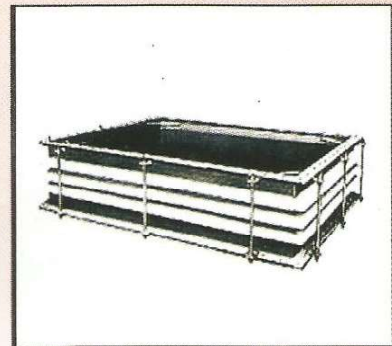

#### Shape- Circle

Range 40mm NB to 3000mm NB

#### Shape- Rectangular

Range 40mmX 40mm to 2400mmX 2400mm

#### Shape – Conical / Reducer Type

Range 40mm NB to 3000mm NB

#### Single & Multiple Arch

**Materials used** are Butyl , Neoprene , EPDM , Natural Rubber Compounds , Nitrile , etc.  
**The products are used in** various media like Water, Air, Acid, Alkali, PAP, DAP, Steam, Oil, Slurry, Sea Water, Dry Ash etc.

( Work in Progress )

**Steel Accesories**

**Testing of materials**

### Infrastructure

We have a talented human capital that is powered by the most sophisticated engineering equipments and modern machineries. We possess a well-equipped research facility for all R&D activities. We always endeavour to stay ahead of competition through our innovative methods and techniques of manufacturing. We work hard to introduce new product enhancements, features, etc. We have a well-equipped factory at Kolkata .

### Our Clients

Combined with the zealous efforts, motivation and technical skills, our organization has a satisfied customer base in the national market. We take pride in satisfying the diverse needs of our clients and wish to develop new business relations with clients all across the globe.

We have successfully catered to numerous clients from diverse industries. With our high quality standards, technical expertise, rich industrial experience and the will to excel, we have garnered the trust and respect of our esteemed clients.
